Membrane roofs between or on top of buildings are often used to protect areas where the level of comfort for the internal temperature is less demanding and the natural daylight is an advantage.

‘Flying’ masts support the translucent membrane roof of the Amagi Multi-Sports Centre and reinforce the impression of light as well as the lightweight character of the roof. The tensegrity roof was built without scaffolding. It was pre-assembled on the floor and attached to a temporary ring for lifting.

The combination of light and weather space in the sports centre allows the construction of other sports halls as well as the use of other sports and leisure facilities.
