**HISTORY:** Documentation of history includes CC, HPI, ROS, and PFSH.

- Internal history:** Subsequent hospital care only requires documentation of new history since last encounter.
- Medically-narrative history:** Documents events. For example, "Further history was unremarkable because..."

**EXAMINATION:** Document specific abnormal, unexpected, and adverse negative findings. A notation of negative or normal is sufficient for normal findings. Extent of exam documented depends on PP.

**MEDICAL DECISION MAKING:** MDM can be viewed as the outcome of a cognitive process that leads to the selection of a course of action to diagnose or treat a patient. There are 3 distinct components to MDM: number of problems, data reviewed/ordered, analysis. The first 2 are quantified; risk is up to the health-care professional to determine. To qualify for a given type of MDM, 2 of the 3 elements must be met or exceeded.

**TIME:** For visits dominated by counseling or coordinating care, document total face-to-face time (in-person) or visit (face-to-face telephone) and that >50% of total time was dominated by counseling or coordinating care. In lieu of log components, time can be used to determine E/M level. >10% was spent counseling and coordinating care. Time is counted only by the reporting health-care professional. Documentation requirement: "I personally spent a total time of ... minutes in the care of this patient; of that, ... minutes was spent in counseling and coordinating care face-to-face."
