The Western Power Distribution (MPD) Wapley site had an imminent ISO 14001 audit. The facility had no containment provision around the pole storage area and some contamination was occurring from creosote leaching out of the poles and into the environment. This would lead to a non-compliance during the annual ISO14001 audit and failure to adhere to Environment Agency regulations, specifically PPG5. The Depot and Environmental Managers needed to identify a quick, effective and permanent solution to be installed and commissioned prior to the site audit.
