

# Everyday Math Second Grade Standards

Name: \_\_\_\_\_ 2018-2019

Operations & Algebraic Thinking	
2.OA.A.1	Use addition and subtraction within 100 to solve word problems involving unknowns in all positions— <i>for</i> , <i>more</i> , or <i>less</i> —in situations involving equal groups, unknown length, or unknown total. Represent unknowns in a problem by a letter, symbol, or number. For example, $8 + \square = 12$ or $50 - \square = 10$ .
2.OA.A.2	Fluently add and subtract within 100, using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction. Examples of strategies include: counting on; making ten; decomposing a ten into ones and tens; using the relationship between addition and subtraction; and creating equivalent problems.
2.OA.B.1	Use addition to solve real-world problems. Represent the problem with an equation, drawing, or objects.
2.OA.B.2	Use subtraction to solve real-world problems. Represent the problem with an equation, drawing, or objects.
2.OA.C.8	Identify arithmetic sequences within a given range of numbers. For example, given the sequence 17, 19, 21, 23, 25, recognize that it starts at 17 and increases by 2 each time.
Number & Operations in Base Ten	
2.NB.A.1	Understand a two-digit number as a number in tens and ones. For example, 46 is composed of 4 tens and 6 ones. Recognize that the number of tens in a two-digit number represents the number of tens in the tens place and the number of ones in the ones place. For example, 70 has 7 tens and 0 ones; 7 tens and 2 ones is 72.
2.NB.A.2	Compose and decompose a two-digit number into tens and ones. For example, 100 can be composed of 10 tens or 100 ones; 50 can be composed of 5 tens or 50 ones; 23 can be composed of 2 tens and 3 ones.
2.NB.B.1	Use a hundred chart to find 10 more or 10 less than a two-digit number.
2.NB.B.2	Use a hundred chart to find 1 more or 1 less than a two-digit number.
2.NB.B.3	Use a hundred chart to add and subtract within 100.
2.NB.C.8	Recognize that the number of tens in a number is the same as the number of groups of ten. For example, 70 is 7 groups of ten.
