

Time-distance graphs

For each of the following draw the travel graph on the axes provided. Remember to label your axes and don't forget to put a title

- 1) James walks to the shop from his home which is 2km away; he does this in 15 minutes. He then is in the shop for 5 minutes and then leaves and walks to school which is 3km away and takes 25 minutes. Draw a time travel graph to show this journey.

- 2) Rachel drives from her house to her sister's which is 100km away. This takes her 1 hour. She then is with her sister for half an hour. She then leaves and goes to her brother's which is a further 50km away, this takes her 45 minutes. She then spend 45 minutes with her brother. Draw a time travel graph to show this journey

- 3) Tom runs 6 miles in 60 minutes. He then runs another mile in 10 minutes, then walks for 20 minutes and covers another mile. He then runs a further mile in 5 minutes. Draw a time distance graph for this journey
- 4) Karla walks from her house to her friend's house which is 2 miles away. This takes her 20 minutes. After she has walked to her friend's house, she has to wait for 5 minutes whilst her friend gets ready then they walk to the cinema which is a further 2 miles from her house. This takes them 30 minutes. Draw a time distance graph for this journey

Graphs And Factors Answer Key

Sabine Zange

A decorative graphic element consisting of a light blue horizontal bar with a rounded right end, and a red circular glow behind it.

Graphs And Factors Answer Key:

Managing and Mining Graph Data Charu C. Aggarwal, Haixun Wang, 2010-02-02 Managing and Mining Graph Data is a comprehensive survey book in graph management and mining It contains extensive surveys on a variety of important graph topics such as graph languages indexing clustering data generation pattern mining classification keyword search pattern matching and privacy It also studies a number of domain specific scenarios such as stream mining web graphs social networks chemical and biological data The chapters are written by well known researchers in the field and provide a broad perspective of the area This is the first comprehensive survey book in the emerging topic of graph data processing Managing and Mining Graph Data is designed for a varied audience composed of professors researchers and practitioners in industry This volume is also suitable as a reference book for advanced level database students in computer science and engineering

Probabilistic Graphical Models Daphne Koller,Nir Friedman,2009-07-31 A general framework for constructing and using probabilistic models of complex systems that would enable a computer to use available information for making decisions Most tasks require a person or an automated system to reason to reach conclusions based on available information The framework of probabilistic graphical models presented in this book provides a general approach for this task The approach is model based allowing interpretable models to be constructed and then manipulated by reasoning algorithms These models can also be learned automatically from data allowing the approach to be used in cases where manually constructing a model is difficult or even impossible Because uncertainty is an inescapable aspect of most real world applications the book focuses on probabilistic models which make the uncertainty explicit and provide models that are more faithful to reality Probabilistic Graphical Models discusses a variety of models spanning Bayesian networks undirected Markov networks discrete and continuous models and extensions to deal with dynamical systems and relational data For each class of models the text describes the three fundamental cornerstones representation inference and learning presenting both basic concepts and advanced techniques Finally the book considers the use of the proposed framework for causal reasoning and decision making under uncertainty The main text in each chapter provides the detailed technical development of the key ideas Most chapters also include boxes with additional material skill boxes which describe techniques case study boxes which discuss empirical cases related to the approach described in the text including applications in computer vision robotics natural language understanding and computational biology and concept boxes which present significant concepts drawn from the material in the chapter Instructors and readers can group chapters in various combinations from core topics to more technically advanced material to suit their particular needs

Computing Science and Statistics Connie Page,Raoul LePage,2012-12-06 Interface 90 is the continuation of an ext remely successful symposium series The series has provided a forum for the interaction of professionals in statistics computing science and in numerical methods wherein they may discuss a wide range of topics at the interface of these disciplines This the 22nd Symposium on the Interface Computing Science and Statistics was held 16 19 May 1990 at the Kellogg Center on the campus of Michigan State University and is the third Symposium to be held under the recently organized Interface Foundation of North America The Interface Board of Directors consists of the nine most recent Symposium Chairs James E Gentle Lynne Billard David M Allen Thomas J
