Meeting the Challenges to Measurement in an Era of Accountability Henry Braun,2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license **Cases on Enhancing P-16 Student Engagement With Digital Technologies**

Gierhart, Aaron R.,2024-12-27 Reimagining how digital technologies are integrated into education is crucial for fostering active and meaningful student engagement Traditional knowledge centric approaches often overlook the dynamic processes students use to interact with and apply technology in their learning By focusing on how students actively engage with digital tools to meet academic and developmental goals educators can create richer more effective learning experiences This shift not only enhances academic outcomes but also prepares students with the critical skills needed to navigate and contribute to an increasingly digital world **Cases on Enhancing P-16 Student Engagement With Digital Technologies** features cases of teaching and learning with digital technologies in P-16 educational settings focusing specifically on what learners do with technology It shares cases of teaching in which technologies are leveraged in student centered ways that transform learning
