

# MASTER CHIEF

## MASTER CHIEF PETTY OFFICER JONES-117

Conscripted into the SPARTAN-II program as a child, the boy named John would be physically augmented and trained in Marine battle armor, ultimately becoming the Master Chief. For three decades, the Spartan would battle against the Covenant, eventually making the critical discovery of Halo and tipping the scales in humanity's favor. But in the aftermath of the war, the Chief would find the human race threatened by another force—an ancient Forerunner known as the Didact. Although the Spartan would prevail, the conflict would not come without a loss: Cortana, the Chief's artificial construct and ally, would perish in battle.

# CORTANA

## CORTANA CTR 0402-S

Created from the mind of Dr. Catherine Halsey, Cortana is a unique AI construct, as she was designed using the neural pathways of a young human. In 2552, she was paired with the Master Chief for Operation: RED FLAG, but the sudden fall of the planet Reach would set the two on a collision course with fate. The discovery of the ancient Forerunner would

not only bring victory in the war against the Covenant, but it would also lead to the reemergence of the Didact—an ancient Forerunner with a sinister hatred of humanity. During a battle aboard the Didact's ship, Cortana would ultimately perish, working her life to stop the new enemy.

Cortana without her construct, a visible signal of instability passed the threshold after seven years of service.
