What topic did you choose? _____ Open Data _____

As you watch the videos keep notes on examples of how they complete each step of the data analysis process:

Collect or Choose Data	Clean and/or Filter Data	Measure and Find Patterns	Use Information
It generates a data set and releases them to the public for better decisions.	Individuals choose their decisions and the data will be filtered accordingly.	Individuals can see how a community can respond and get patterns from it.	As new information gets in, the data set will get updated better impacting the people positively.

What is the core idea of your topic? (What is it about?)

Open Data is an open source data meaning that everyone has access to it. The core idea is that it can accumulate more data getting better results. It constantly changes and can impact a person's life in different ways mostly in a positive way.
