## Geology

Geology, from the Greek geo, "Earth", and logos, "discourse". It is the science that pursues the understanding of planet Earth.

Physical geology studies the materials that make the Earth and seeks to understand the different processes that act below and above the Earth's surface.

The objective of historical geology is to understand the origin of the Earth and its evolution over time.

## Geology and the environment

Natural hazards are part of life on Earth. Every day they adversely affect literally millions of people around the world and are responsible for staggering damage.

Among the hazardous earth processes studied by geologists are volcanoes, floods, earthquakes and landslides.
