

Equivalent Expressions

Equivalent expressions are algebraic expressions which may look different but represent the same mathematical process or operation.

 Examples

$$3x + 7y = 7y + 3x$$

← Addition is commutative - this means that the order in which we add terms is not important.

$$3a - 8b = -8b + 3a$$

← We can think of subtraction as equivalent to adding a negative amount.

$$3(x + 7) = 3x + 21$$

← Multiplying each term by 3 is equivalent to multiplying the whole expression by 3
