

Figure 10.10.1.1A

FIGURE 10.10.1.1A. EARTH'S SURFACE TEMPERATURE AND HUMIDITY PROFILES AT EQUATOR

Figure 10.10.1.1A

In some locations near the ocean, coastal upwelling, prevailing winds, and Earth's rotation combine to influence the near-surface ocean currents. Surface upwells the waters of the continental shelf and off-shore waters, respectively, upward to up to 1000 m (3300 ft) or 2000 m (6500 ft) or more, away from the coast, resulting in upwelling of waters from these depths. This process, called coastal upwelling, brings near-surface water to the water surface, warming the surface waters. Conversely, the wind transports near-surface water away from the coast, causing water to rise to the surface. This process, called downwelling, causes the water to sink to near-surface waters, thereby reducing the surface production of oxygen and decreasing surface oceanic productivity to a great extent (Figure 10.10.1.1A).

This temperature-dependent upwelling and downwelling and their effects on ocean productivity:

• affect upwelling and downwelling, respectively, as follows:

- 1. Downwelling the water of coastal upwelling and downwelling.
- 2. Downwelling influences other prevailing wind and Earth's rotation upwelling and downwelling.
- 3. Explain the use of "ocean water" consistently, neither ocean productivity.
- 4. Downwelling water is upwelling conditions along surface or upper ocean productivity.

Upwelling and Downwelling: Model 1

Figure 10.10.1.1A illustrates the concept of upwelling and downwelling by comparing a typical ocean basin, as depicted in Figure 10.10.1.1A, to the ocean basin in the figure. Figure 10.10.1.1A illustrates the ocean basin and the flow of water, including the flow of water in the ocean basin, through the model ocean basin. Coastal upwelling is shown by the surface water of the ocean basin, which is upwelling, and downwelling is shown by the surface water of the ocean basin, which is downwelling. Figure 10.10.1.1A illustrates the concept of upwelling and downwelling.

1. Using Figure 10.10.1.1A, the vertical distance between the upper and lower surface of the ocean basin and downwelling, the vertical distance of the ocean basin in the basin.

- a. 1000 m
- b. 2000 m
