## Identify the issue

Define the problem, gather relevant data, and formulate a hypothesis. What exactly are you trying to achieve? What resources do you need?

## Quickly try out a solution

Implement your plan – but start small. This stage is a controlled experiment, not full-scale deployment.

## Launch or adjust

If your solution proved effective, how can you implement it more widely? If it fell short, what adjustments are needed? Perhaps you need to return to the planning stage with new insights.

## See if it works

Step back and examine what happened. Did you get the desired result? Why or why not? Compare your actual outcomes against your predictions, looking for insights and unexpected consequences.
