

Chemistry – Unit 4 Worksheet 2

Avogadro's Hypothesis

Part 1

You have seen evidence that two volumes of hydrogen gas react with one volume of oxygen gas (at the same T and P) to produce water. The conclusion that two *molecules* of hydrogen combine with one *molecule* of oxygen to form water works only if we assume that each volume of gas contains the same number of particles.

(Amedeo Avogadro (~1800 A.D., Italy) made a hypothesis, and concluded with experiments, that containers of gas at the same Temperature and Pressure appear to contain the same number of particles)

2. Represent molecules of hydrogen and oxygen in the containers below. React these molecules to form water molecules, leaving no leftover gas.

What do the H, O, and 2 in the chemical formula tell us about the composition of water?
