Evolution and Ecology of the Organism Michael Robertson Rose,Laurence D. Mueller,2006 For sophomore to junior level courses in Evolution with an Introductory Biology prerequisite This text introduces biology majors to the basic concepts of the fields comprising Darwinian biology population genetics population ecology community ecology macroevolution physiological ecology systematics and functional morphology The general theme is the interconnectedness of organism environment and evolution Just as biochemistry and molecular biology provide the foundation for our understanding of the cell evolutionary biology and ecology are used to construct a foundation for understanding the organism Using evocative language and an eye catching magazine format the authors aim to prepare undergraduates for more advanced specialist courses in Darwinian biology as they pursue their degrees **Gender, Class, and Freedom in Modern Political Theory**

Nancy J. Hirschmann,2009-04-11 In *Gender Class and Freedom in Modern Political Theory* Nancy Hirschmann demonstrates not merely that modern theories of freedom are susceptible to gender and class analysis but that they must be analyzed in terms of gender and class in order to be understood at all Through rigorous close readings of major and minor works of Hobbes Locke Rousseau Kant and Mill Hirschmann establishes and examines the gender and class foundations of the modern understanding of freedom Building on a social constructivist model of freedom that she developed in her award winning book *The Subject of Liberty Toward a Feminist Theory of Freedom* she makes in her new book another original and important contribution to political and feminist theory Despite the prominence of state of nature ideas in modern political theory Hirschmann argues theories of freedom actually advance a social constructivist understanding of humanity By rereading human nature in light of this insight Hirschmann uncovers theories of freedom that are both more historically accurate and more relevant to contemporary politics Pigeonholing canonical theorists as proponents of either positive or negative liberty is

historically inaccurate she demonstrates because theorists deploy both conceptions of freedom simultaneously throughout their work **Biolog** ,1998 **Prentice Hall Exploring Life Science** Anthea Maton,1997
