How to Interpret the House-Tree-Person Test

By Jaime Coyne, eHow Contributor

The house-tree-person test can be an effective way to evaluate children, people with brain damage and people with a limited ability to communicate for personality disorders. A projective personality test, the house-tree-person test requires the test taker to draw a house, a tree and a person. The test is then used as a measure of self-perception, outlook and sometimes brain damage. Interpretations of the test are subjective, and based loosely on a set of basic principles. Have a question? Instructions

1. House Interpretations

o **1**
Notice the size of the house: a small house represents renunciation of family life, while a large house means the person is overwhelmed by his family.

o **2**
Observe the walls of the house: weak lines represent fragility in the ego, while strong lines mean the need to fortify boundaries.

o **3**
Determine the amount of detail put into the roof: the more detail, the more the person concentrates on fantasies, while an incomplete roof means evading formidable ideas.

o **4**
Note the inclusion of windows, doors and sidewalks, which indicate openness to interacting with other people.

o **5**
Discern the inclusion of bushes, shades, shutters, bars and curtains, which indicate a person's hesitation to open himself to others.

2. Tree Interpretations

o **6**
Notice the size of the trunk: a small trunk represents a weak ego, while a large trunk means a larger ego.

o **7**
Observe whether the trunk is split in half, which indicates a split personality.

o **8**
Determine what kind of limbs were drawn: detached or small branches represent a difficulty communicating with others, big branches mean connecting with others too much, pointy branches indicate hostility and dead branches represent desolation.
