FIVE SENSES READING COMPREHENSION Reading

Read the first three of the Five Senses and answer the questions.

Introduction: The five senses—sight, hearing, touch, taste, and smell—are the ways in which we receive information about the world around us. They are the ways in which we experience the world around us. They are the ways in which we learn about the world around us.

Sight: Sight is the sense that allows us to see the world around us. It is the sense that allows us to see the colors, shapes, and sizes of things. It is the sense that allows us to see the things that are in front of us.

Hearing: Hearing is the sense that allows us to hear the sounds around us. It is the sense that allows us to hear the voices of people, the sounds of music, and the sounds of nature. It is the sense that allows us to hear the things that are around us.

Touch: Touch is the sense that allows us to feel the things around us. It is the sense that allows us to feel the texture of things, the temperature of things, and the shape of things. It is the sense that allows us to feel the things that are in front of us.

Taste: Taste is the sense that allows us to taste the things around us. It is the sense that allows us to taste the flavors of food, the sweetness of sugar, and the sourness of lemons. It is the sense that allows us to taste the things that are in front of us.

Smell: Smell is the sense that allows us to smell the things around us. It is the sense that allows us to smell the fragrance of flowers, the smell of perfume, and the smell of food. It is the sense that allows us to smell the things that are in front of us.
