a. The ultimate source of variation. Individual mutations occur so rarely that mutation alone usually does not change allele frequency much.

b. A very potent agent of change. Individuals or gametes move from one population to another.

c. Inbreeding is the most common form. It does not alter allele frequency but changes the proportion of heterozygotes.

d. Statistical accidents. The random fluctuation in allele frequencies increases as population size decreases.

e. The only agent that produces adaptive evolutionary changes.

Evolution in Plain and Simple English BookCaps Study Guides Staff, 2011 Ever since it was famously propounded by Charles Darwin evolution has been one of the most influential scientific doctrines at all time And even though it s been almost 100 years since the Scopes trial evolution continues to be one of the most controversial scientific doctrines of all time But in truth the basic concept of evolution the idea that species change over time to adapt to their environment is quite simple even obvious once one thinks of it After reading this book you

should be able not only to understand the basic concepts of evolution but to appreciate both what it does and what it does not accomplish
