
AQA A-LEVEL BIOLOGYP A PHOTOSYNTHESIS REVISION EXAM QUESTIONS WITH CORRECT ANSWERS PROVIDED 2025/2026 EDITION

Glucose - $C_6H_{12}O_6$ - a simple sugar which is produced in photosynthesis.

Adenosine triphosphate - An activated nucleotide found in all living organisms, which is produced during respiration and acts as an energy carrier. ATP is produced during the light-dependent reaction of photosynthesis.

Metabolism - The chemical processes that occur within a living organism in order to maintain life.

Photosynthesis - A complex metabolic pathway involving many intermediate reactions. Some energy in light is conserved in the form of chemical bonds. There are three main stages: capturing the light energy, the light-dependent reaction and light-independent reaction.

Photolysis - Light energy splits 2 water molecules into 4 electrons, 4 hydrogen ions (protons) and an oxygen molecule. These electrons replace the electrons lost from a chlorophyll molecule when light strikes it.

Oxidation - Loss of electrons or loss of hydrogen or gain of oxygen with a substance.

Reduction - Gain of electrons or gain of hydrogen or loss of oxygen from a substance.

Co-enzyme - A non-protein compound that is necessary for the functioning of an enzyme. (NOT AN ENZYME!) Play a huge role in photosynthesis and respiration where they carry hydrogen atoms from one molecule to another. E.g. NAD, FAD and NADP.

NADP - An electron carrier that is important in photosynthesis. When it takes up protons the NADP becomes reduced.

Ocean currents and the open ocean James A. Kolb,1996 Ten Assessment Literacy Goals for School Leaders Stephen Chappuis,Steve Chappuis,Susan M. Brookhart,Jan Chappuis,2021-04-21 Of all school related factors that influence student learning only classroom instruction has greater impact than leadership And leaders have the greatest impact when they set direction citing that the goals and purpose they provide serves to strengthen and solidify the faculty The ten competencies for school leaders described in this book are based on a few factors First standards driven reform has created new knowledge requirements and responsibilities for school leaders In today s systems sorting students along a bell curve and artificially creating winners and losers has been replaced by a mission that all students must learn well Instead of a curriculum focused on what a teacher should teach the curriculum identifies what students must know and be able to do These standards are public and communicate what a state or district values when it comes to student learning Assessing the standards day to day not through large scale accountability tests or even local short cycle or common assessments is a requirement for effective standards based reform Second is the reward of improved student learning brought about by the use of classroom assessment for learning Assessment for learning has implications not just for school leaders but also for broader educational practice The research is conclusive and improved learning lies within the grasp of anyone wishing to apply it What does it look like when school leaders demonstrate mastery of the Ten Assessment Competencies Included in the book are examples learning activities and opportunities for practice as well as success indicators for each competency as
