Holiday Gift Guide 2013:

Focus On: 100 Most Popular 21st-century American Musicians Wikipedia contributors, Restricted Access Elizabeth Ellcessor, 2016-03-29 How reconsidering digital media and participatory cultures from the standpoint of disability allows for a full understanding of accessibility While digital media can offer many opportunities for civic and cultural participation this technology is not equally easy for everyone to use Hardware software and cultural expectations combine to make some technologies an easier fit for some bodies than for others A YouTube video without closed captions or a social network site that is incompatible with a screen reader can restrict the access of users who are hard of hearing or visually impaired Often people with disabilities require accommodation assistive technologies or other forms of aid to make digital media accessible useable for them Restricted Access investigates digital media accessibility the processes by which media is made usable by people with particular needs and argues for the necessity of conceptualizing access in a way that will enable greater participation in all forms of mediated culture Drawing on disability and cultural studies Elizabeth Ellcessor uses an interrogatory framework based around issues of regulation use content form and experience to examine contemporary digital media Through interviews with policy makers and accessibility professionals popular culture and archival materials and an ethnographic study of internet use by people with disabilities Ellcessor reveals the assumptions that undergird contemporary technologies and participatory cultures Restricted Access makes the crucial point that if digital media open up opportunities for individuals to create and participate but that technology only facilitates the participation of those who are already privileged then its progressive potential remains unrealized Engagingly written with powerful examples Ellcessor demonstrates the importance of alternate uses marginalized voices and invisible innovations in the context of disability identities to push us to rethink digital media accessibility Marketing That Works Leonard M. Lodish, Howard L. Morgan, Shellye Archambeau, Jeffrey Babin, 2015-06-22 Discover New Entrepreneurial Marketing Strategies for Supercharging Profits and Sustaining Competitive Advantage This practical guide shows how to use modern entrepreneurial marketing techniques to differentiate your company in the eyes of customers to achieve sustainable profitability The authors focus on innovative strategies and tactics pioneered by some of today's most successful and disruptive companies including Google Quidsi diapers.com Apple Victoria's Secret Anki Pebble Metricstream and Warby Parker These high impact methods will help entrepreneurs achieve immediate bottom line results through more effective marketing Based on The Wharton School of the University of Pennsylvania's pioneering Entrepreneurial Marketing course this edition is fully updated to reflect what works in the marketplace today Guided by the authors collaboration with dozens of high growth companies it offers new insights into which marketing programs and distribution channels are likely to succeed and how to leverage them in your unique business environment even with limited resources The authors begin by helping you refine your competitive positioning by clarifying What am I selling to whom and Why do they care Next they guide you through the fundamentals of

Teaching Differential Equations with Modeling-First Scenarios Brian J. Winkel, 2026-03-12 Written by the founder of SIMIODE Systemic Initiative for Modeling Investigations and Opportunities with Differential Equations this book provides a collection of resources that facilitate a modeling first approach to teaching differential equations Each of the forty three chapters presents a unique realistic and classroom tested modeling scenario covering diverse topics such as chemical kinetics stochastic processes circuit tuning and stadium design The modules are standalone meaning they can easily be introduced into an instructor s differential equations course Through these activities students discover how differential equations arise naturally and appreciate their importance The material is presented in an informal style taking the form of conversations between two colleagues discussing the underlying modeling scenarios These colleagues share their methods pedagogical approaches and experiences answering questions which arise about how to teach modeling These dialogs also provide scaffolding advice and reflections for faculty considering introducing active learning opportunities into their classes Teaching Differential Equations with Modeling First Scenarios offers a friendly introduction to modeling activities in the undergraduate classroom with only prior exposure to derivatives being required For the instructor a desire to engender an attitude of experimentation investigation and excitement in their students is the most important prerequisite Materials supporting the scenarios will be available on the AMS Bookstore at www.ams.org/bookpages/clrm.78 and on the SIMIODE webpage
