**Elizabeth Baigent, André Reyes Novaes**

### **Ieb Life Science 2014 Exemolar:**

**Geographers** Elizabeth Baigent, André Reyes Novaes, 2022-06-16 The 40th volume of Geographers Biobibliographical Studies focuses exclusively on geographers from the Global South For the first time in the serial's history the entire volume is devoted to geographers who were born or who lived in South America and is combined with an editorial which roots their lives and careers in the context of the Global South more generally These geographers biobibliographies which consider their personal and professional trajectories and encounters deepen our understanding of geography as a whole and raise important wider questions of the scope and place of Southern scholarship This volume includes meticulously detailed volumes on five of the most prominent and ground breaking geographers in the Global South including The Argentinian geographer Elina González Acha de Correa Morales who was the first woman to apply for membership of the Argentinean Geographical Institute in 1888 and who played an important role in developing geographical science in Argentina The Brazilian geographer Bernardino de Souza active in Brazil in the late nineteenth century as a secretary of the Geographical and Historical Institute of Bahia The Portuguese scholar Jaime Zuzarte Cortes o Director of the National Library of Portugal who was exiled in Brazil between 1940 and 1957 and greatly influenced research into the exploration and mapping of South America The Brazilian geographer Josu Apolinário de Castro who was a member of the United Nations Food and Agriculture Organisation's international advisory group on nutrition during the 1940s and the 1950s The late twentieth century Brazilian geographer Antônio Carlos Robert Moraes who was a key figure in the circulation of critical approaches in Brazilian geography Together these biobibliographies allow the reader to focus on the Global South as a place of geographical knowledge production translation and reception enlarging our discipline's histories The volume also links the serial firmly to wider debates on decolonisation and post colonialism and is the latest manifestation of the editorial drive to broaden the serial's reach and impact and to consolidate its place as an important vehicle in narrating geography's international story

**Routledge Handbook of Law and Religion** Silvio Ferrari, 2015-03-05 The field of law and religion studies has undergone a profound transformation over the last thirty years looking beyond traditional relationships between State and religious communities to include rights of religious liberty and the role of religion in the public space This handbook features new specially commissioned papers by a range of eminent scholars that offer a comprehensive overview of the field of law and religion The book takes on an interdisciplinary approach drawing from anthropology sociology theology and political science in order to explore how laws and court decisions concerning religion contribute to the shape of the public space Key themes within the book include Religions symbols in the public space Religion and security Freedom of religion and cultural rights Defamation and hate speech Gender religion and law This advanced level reference work is essential reading for students researchers and scholars of law and religion as well as policy makers in the field

**With and Without Galton** N. L. Krementsov, 2018 In 1865 British polymath Francis Galton published his initial thoughts about the scientific field that

would become eugenics The same year Russian physician Vasilii Florinskii addressed similar issues in a sizeable treatise entitled *Human Perfection and Degeneration* Initially unheralded Florinskii's book would go on to have a remarkable afterlife in twentieth and twenty first century Russia In this lucid and insightful work Nikolai Kremontsov argues that the concept of eugenics brings together ideas values practices and fears energised by a focus on the future It has proven so seductive to different groups over time because it provides a way to grapple with fundamental existential questions of human nature and destiny With and Without Galton develops this argument by tracing the life story of Florinskii's monograph from its uncelebrated arrival amid the Russian empire's Great Reforms to its reissue after the Bolshevik Revolution its decline under Stalinism and its subsequent resurgence first as a founding document of medical genetics and most recently as a manifesto for nationalists and racial purists Kremontsov's meticulously researched biography of a book sheds light not only on the peculiar fate of eugenics in Russia but also on its convoluted transnational history elucidating the field's protean nature and its continuing and contested appeal to diverse audiences multiple local trajectories and global trends It is required reading for historians of eugenics science medicine education literature and Russia and it will also appeal to the general reader looking for a deeper understanding of this challenging subject Publisher's website

Embark on a transformative journey with Explore the World with is captivating work, Discover the Magic in **Ieb Life Science 2014 Exemolar** .
