Presented in four parts with a streamlined structure it includes over 70 contributions written by expert international researchers addressing the central ideas through which human geographers understand and shape their subject. It maps out the big foundational ideas that have shaped the discipline past and present, explores key research themes being pursued in human geography's various sub-disciplines, and identifies emerging collaborations between human geography and other disciplines in the areas of technology, justice, and environment. This comprehensive, stimulating, and cutting-edge introduction to the field is richly illustrated throughout with full-colour figures, maps, and photos. The book is designed especially for students new to university degree courses in human geography across the world and is an essential reference for undergraduate students on courses related to society, place, culture, and space.
