Aligning Third-grade Fractions Curriculum with the Common Core State Standards: a Teacher's Plan for Implementation Brooke L.N.. Webster,California State University, Sacramento,2013 The last implementation of state standards was in 1997 when California and the rest of the country were in an economic climate that supported growth in so many aspects including education In 2010 the state of California adopted new State Standards set forth by the federal and state governments California teachers are tasked with implementing these standards however many teachers are not being provided with the necessary tools to support their teaching With larger class sizes and little to no money teachers are being asked to change in an environment that offers them little to no support Common Core Standards are of the educational future in California Due to the lack of financial support in buying new curriculum that aligns to these standards teachers will have to rely on their own professional practices to help them implement to these new standards For the teachers in many districts this means developing support lessons and materials that align with these new standards while using their old non aligned curriculum as the base This master's project will help teachers to bridge the curricular gap
