

INTRODUCTION

This course deals with basic hardware servicing and maintenance of personal computer and compatibility of different computer services, ranging from old system up to the latest high-end systems like Core i series and AMD, Ryzen, Athlon. It helps the students learn the basic trouble shooting of hardware components and accessories of IBM PC-ACT compatibles commonly used in different working environment of society. It guides students to learn technical knowledge and skill to repair, upgrade and trouble shoot any of the aforementioned equipment.

What is Basic Hardware maintenance?

Maintaining hardware helps to extend the computer's lifespan. It helps to prevent wear and tear, and keeps the system functioning smoothly.

In dealing with basic hardware maintenance some basic terminologies and principle has to be defined, things like circuit, current, voltage, resistance, capacitor, transistors.

As the definition of computer implies as an electronic device, operating under the control of instruction stored in its own memory that can:

- Accept data (input)
- Process the data according to specified rules (process)
- Produce results (output)
- Store the results (storage) for future use.

For every digital computer require an electronic component or device in order to function. As a result of inter-connected and inter-dependent component.
