Building Materials Kathleen Hess-Kosa,2017-04-07 The construction industry is bombarded with ever changing building materials components of which are more and more difficult if not impossible to identify Building material emissions have been implicated as a major source of indoor air pollution and toxic gases often unidentified are generated in building fires Building Materials Product Emission and Combustion Health Hazards undertakes the task of identifying building materials emission and combustion health hazards This practical guide introduces the complex world of polymers commonly used in building materials along with plasticizers and additives that are not regulated by OSHA It also explores the topic of building materials as they relate to function and their emissions combustion products along with thermal decomposition and combustion products as they relate to fire first responders Engaging environmental professionals construction management firms architects first respondents and students this valuable reference delivers a comprehensive spectrum of knowledge needed to face the challenges of managing building materials in the twenty first century Awareness is the first line of defense

Managing Health, Safety and Well-Being Aditya Jain,Stavroula Leka,Gerard I.J.M. Zwetsloot,2018-04-11 To achieve sustainable progress in workplace and societal functioning and development it is essential to align perspectives for the management of health safety and well being Employers are responsible for providing every individual with a working environment that is safe and does not harm their physical or mental health However the current state of the art indicates that approaches used to promote health safety and well being have not had the anticipated results At the level of the enterprise it is widely understood and accepted by all stakeholders that employers share the responsibility of promoting and managing the health of their workers Evidence indicates that most employers put in place procedures and measures to manage workers health and create healthy workplaces to meet legal requirements as a response to requests by employees as a need to improve company image reputation and to improve productivity This highlights that in addition to legal requirements the key drivers for companies also include the ethical and business case While much has been written about role of legislation and the business case for promoting health safety and well being not much is known about the ethical case for promoting employment and working conditions In this context this book examines the potential of the link between responsible and sustainable workplace practices human rights and worker health safety and well being and explores how complementary approaches can be used to promote employment and working conditions and sustainability at the organizational level It offers a framework for aligning different approaches and perspectives to the promotion of workers health safety and well being and provides recommendations for introducing such an approach at the enterprise level

Proceedings of the 21st Congress of the International Ergonomics Association (IEA 2021) Nancy L. Black,W. Patrick Neumann,Ian Noy,2021-05-04 This book presents the proceedings of the 21st Congress of the International Ergonomics Association IEA 2021 held online on June 13 18 2021 By highlighting the latest theories and models as well as

cutting edge technologies and applications and by combining findings from a range of disciplines including engineering design robotics healthcare management computer science human biology and behavioral science it provides researchers and practitioners alike with a comprehensive timely guide on human factors and ergonomics It also offers an excellent source of innovative ideas to stimulate future discussions and developments aimed at applying knowledge and techniques to optimize system performance while at the same time promoting the health safety and wellbeing of individuals The proceedings include papers from researchers and practitioners scientists and physicians institutional leaders managers and policy makers that contribute to constructing the Human Factors and Ergonomics approach across a variety of methodologies domains and productive sectors This volume includes papers addressing the following topics Ergonomics in Design for All Human Factors and Sustainable Development Gender and Work Slips Trips and Falls Visual Ergonomics Ergonomics for children and Educational Environments Ageing and Work
