Who I am - essay example

Life is a learning process - it leads you through series of ups and downs that, unfortunately, one is unable to foresee. I possess a diversity of experiences, so I owe a debt of gratitude to the people especially my family, friends and the community has contributed to my intellect of who I am and my opinion of the world.

My life changing experience is an interesting story to the average teenage situation. This gave me a true outlook on people and their behaviour. My identity had been shaped by influences of nationality, race, ethnic group, physical appearance, culture, talents, interests, and language

Culture is defined as the behaviours of a particular group of people that are commonly considered to be the tradition which are conveyed from generation to generation. In 2005, I went through the rudiment of the Police training and had my first posting to the Fingerprint Section at the Criminal Investigations Department (CID) at the Police Headquarters where i was selected to go for further training at the Federal Bureau of Investigations (FBI), the United States secret Service at the Scotland Yard for a period of one year. Not until I was offered the scholarship to continue my studies at the FBI, I have always been the same. And I will be the first to admit this: it was very scary training. I was unable to predict what was ahead of me since I was about 1,686 miles away from home, where I had built every memory of my life. When making the choice to upgrade myself, I found that I was repeatedly asking myself the same question: Why would I want to leave something so great? That is my parents, and the friends I socialize with in my community? For me, the chance of finding something greater, in a place that I had never experienced before, was the motivation I needed to just go for it no matter the occurrence. The answer to my question is the sole reason I chose to take chance ten years ago, and why I am convinced moving away f

web find the equation of the line in all three forms listed above two of the forms require slope so let s find that first slope $m = \frac{\Delta y}{\Delta x} = \frac{5 - 4}{5 - 2} = \frac{1}{3}$ now we can plug in m and one of the points say $(5, 5)$ to get point slope form $y - 5 = \frac{1}{3}(x - 5)$

web what is the equation for a vertical line the slope is undefined and where does it cross the y axis in fact this is a special case and we use a different equation not $y =$ but instead we use $x =$ like this $x = 5$ every point on the line has x coordinate 5 that is why its equation is $x = 5$
