The Geneva Papers Christophe Courbage, 2016-04-29 In January 1976 Raymond Barre the first President of The Geneva Association and Orio Giarini its first Secretary General founded The Geneva Papers on Risk and Insurance with the main goal of supporting and encouraging research in the economics of risk and insurance At that time research in the field of insurance was still embryonic and insurance was regarded as peripheral social activity When sustained economic growth gained traction the function of insurance gradually emerged as a key contributor to economic development By integrating uncertainty into economic theory and benefiting from the progress of both financial economics and decision theory research developed further in the field of insurance economics and risk management and is now prolific The Geneva Papers on Risk and Insurance undeniably contributed to this evolution and its impact on research in insurance has largely exceeded what its two founding members could have expected This volume is a special collection of papers celebrating 40 Years of The Geneva Papers on Risk and Insurance The collection looks back at the storied history of The Geneva Papers on Risk and Insurance and features papers from some of the esteemed authors who have contributed to the journal in its lifetime This collection of papers highlights just a few of the many themes addressed in the papers published by the journal since it was created Nevertheless the selection exemplifies the richness and variety of topics the field of insurance covers The Impact of International Regulatory Standards on the Competitiveness of U.S. Insurers United States. Solvency Arne Sandstrom, 2005-09-19 Until now there were no published analyses of the recent solvency work conducted in Europe specifically the risk categories proposed by the International Actuarial Association IAA Answering the insurance industry's demand in the wake of the EU Solvency II project Solvency Models Assessment and Regulation provides a concrete summary and review Tax Notes International, 2005 *The Principle of Proportionality, Solvency II and Captives* Marta Ostrowska, 2025-03-05 This book offers an in depth analysis of the principle of proportionality in the EU insurance regulatory

regime It takes a critical look at how proportionality has been implemented in Solvency II and tests its effectiveness on captive re insurance undertakings Given their unique business model captives are considered the primary beneficiary of proportionality and therefore offer the perfect litmus test for the principle s effectiveness In a world characterized by overregulation and increasingly complex financial markets governments and policymakers face the challenge of regulating markets without hindering their growth As one size fits all approaches have long since been recognized as detrimental the EU is seeking to develop a regulatory technique which allows more individual regulatory treatment while ensuring a level playing field The first revolutionary step towards this goal was taken in Solvency II Directive 2009 138 EC which introduced a principle of proportionality to the EU insurance market The principle is a unique tool which makes it possible to adjust the requirements of the Solvency II framework to the nature scale and complexity of each individual insurance undertaking s risk profile It is intended to help remove an unnecessary regulatory burden for insurance undertakings and to prevent the proliferation of regulations in general However the practical implementation of proportionality is not without its share of obstacles The principle s generic nature and the lack of guidance have caused a great deal of confusion regarding its practical application and prevented insurance undertakings from using its benefits to the fullest Consequently the principle of proportionality has been subject to revision within the first Solvency II review process The book will benefit captive owners captive managers regulators supervisors practitioners academics students and more generally all those involved with or interested in the insurance market
