Behavioral Science & Policy: Volume 2, Issue 1 Craig Fox, Sim B. Sitkin, 2016-11-22 The success of nearly all public and private sector policies hinges on the behavior of individuals, groups, and organizations. Today such behaviors are better understood than ever thanks to a growing body of practical behavioral science research. However, policymakers often are unaware of behavioral science findings that may help them craft and execute more effective and efficient policies. The pages of this new journal will become a meeting ground, a place where scientists and non-scientists can encounter clearly described behavioral research that can be put into action. By design, the scope of BSP is broad with topics spanning health care, financial decisionmaking, energy and the environment, education and culture, justice and ethics, and work place practices. Contributions will be made by researchers with expertise in psychology, sociology, law, behavioral economics, organization science, decision science, and marketing. The journal is a key offering of the Behavioral Science Policy Association in partnership with the Brookings Institution. The mission of BSPA is to foster dialog between social scientists, policymakers, and other practitioners in order to promote the application of rigorous empirical behavioral science in ways that serve the public interest. BSPA does not advance a particular agenda or political perspective. The first issue's contents follow: Behavioral Science Policy vol 2 no 1 Table of Contents, Editors Note, Spotlight: Pre-Kindergarten Interventions, American Policy on Early Childhood Education Development: Many Programs, Great Hopes, Modest Prospects, Ron Haskins, Evidence for the Benefits of State Prekindergarten Programs, Myth Misrepresentation, Dale C. Nunes, Lisa Emelia Svensson, Anil Markandya, 2017-02-24 The trans-disciplinary thematic areas of oceans management and policy require stocktaking of the state of knowledge on ecosystem services being derived from coastal and marine areas. Recently adopted Sustainable Development Goals (SDGs), especially Goals 14 and 15, explicitly focus on this. This Handbook brings together a carefully chosen set of world-class contributions from ecology, economics, and other development science, and attempts to provide policy-relevant scientific information on ecosystem services from marine and coastal ecosystems, nuances of economic valuation, relevant legal and sociological response policies for effective management of marine areas for enhanced human well-being. The contributors focus on the possible nexus of science, society, and science policy with the objective of informing

on decision makers of the governmental agencies business and industry and civil society in general with respect to sustainable management of Oceans
