*An Automated Grader for Short Answer Responses* Sami Saqer,Macalester College. Mathematics, Statistics and Computer Science Department,2010 Computers routinely grade multiple choice questions by simply matching them to an answer key Can they effectively score essay exams This report examines an automated technique for grading short answer response using a grading system I have constructed This system assigns a grade to a student answer based on its similarity to a model answer provided by an instructor Similarity is measured using 1 the semantic similarity between isolated words and 2 the similarity between the order of those words The performance of the system was evaluated by scoring actual exam questions and comparing the computer assigned grades to those given by human instructors In favorable situations the correlation between the computer and the human assigned grades was only a little less than between human instructors Several characteristics of texts can cause the performance of the system to degrade For example the system s performance is poor with answers that contain negations truly unique phrases of idioms misspelled words or contradictory information
