Hands-On Social Studies, Grade 3 Jennifer Lawson, 2005 *Hands On Social Studies for Ontario* is filled with a year's worth of classroom tested activities. The grade 3 book is divided into two units: *Communities in Canada 1780-1850* and *Living and Working in Ontario*. With materials for both teachers and students, this new edition includes many familiar great features: curriculum correlation charts, summary charts showing expectations, complete easy-to-follow lesson plans, visuals, and blackline masters, material lists, and hands-on student-centered activities. Exciting new features include photos, files that relate to the lesson topics, ideas for extending the learning opportunities for self-reflection and activating prior knowledge, authentic assessment for as and of learning opportunities, the five components of the inquiry model, concepts of social studies thinking, guided inquiry questions, and learning goals and support for developing historical thinking skills. [Mapping My Day](#) Julie Dillemath, 2021-03-22 Follow Flora and her zany family as she takes us through her day with a series of vibrant and interactive maps. In our current GPS ruled world, map reading is something of a dying art. But learning to read, understand, and draw maps is a fun and active way for children to develop spatial thinking skills, how we think about and understand the world around us, and use concepts of space for problem solving. Early exposure to maps concepts can help foster this type of cognitive development in children and boost their math and science learning as they progress through school. Each hand-drawn kid-friendly map highlights key map concepts in the context of a story or puzzle. Figure out which route to school is the fastest, how to find Flora's buried treasure, and even how to complete a dog agility course. Includes a Note to Parents, Caregivers, and Professionals with more information about maps and spatial concepts, as well as questions, games, and activities designed to encourage children to map their own days. From the Note to Parents, Caregivers, and Professionals: For readers of all ages, the three goals of this book are to: 1. show readers that maps can convey many types of information. Maps can tell all sorts of stories, sometimes more easily than with words. 2. inspire kids to draw their own maps and diagrams. Drawing spatial relationships is an excellent way to develop this spatial skill, and understanding spatial relationships is important for many aspects of life, including math and science learning. 3. introduce basic map concepts and vocabulary and demonstrate why they are important. Each map in the story highlights just one or two map concepts at a time: compass, rose, scale, bar, legend, etc., which are necessary for understanding that particular map. *Magellan Mapping Module* Cynthia A. Miller, 1992 **Social Studies** Laurie E. Westphal, 2007 *Differentiating Instruction With Menus* offers teachers everything they need to create a student-centered learning environment based on choice. Addressing the four main subject areas: language arts, math, science, and social studies, and the major concepts taught within these areas, these books provide a number of different types of menus that elementary-aged students can use to select exciting products that they will develop, so teachers can assess what has been learned instead of using a traditional worksheet format. Each book contains attractive, reproducible menus, each based on the levels of Bloom's revised taxonomy for students to use to guide them in making

decisions as to which products they will develop after studying a major concept or unit Using creative and challenging choices found in Tic Tac Toe Menus List Menus 2 5 8 Menus Baseball Menus and Game Show Menus students will look forward to sharing their newfound knowledge throughout the year Also included are specific guidelines for products rubrics for assessing student products and teacher introduction pages for each menu This book includes menus that teach students about ancient history American history government U S documents people in history and geography **Orienteering Made Simple and Gps Technology** Nancy Kelly,2012-09-28 This book is designed to teach orienteering and GPS technology as an educational tool in the school curriculum The book uses a multi disciplinary approach to foster self confidence cooperative learning team building problem solving decision making and love for the outdoors The activities are adaptable to a wide variety of grade levels and can be used in most subject areas The book includes a series of hands on activities worksheets and interactive lessons that are fun and educational letting the students learn through exploration and problem solving

Foundations of Education: Instructional strategies for teaching children and youths with visual impairments M. Cay Holbrook,Alan J.
