information In this study a graphic organizer was designed using Polya s 1985 problem solving phases and Schoenfeld s 1987 questioning techniques to promote problem solving success and increase problem solving processes in student solutions

Students success and process scores increased significantly by using a graphic organizer During interviews students

reported that the graphic organizer made them slow down when solving the problems causing them to avoid minor mistakes

and errors It was concluded that a graphic organizer can be used beyond text comprehension in reading and can promote

problem solving skills and increase problem solving success in a secondary mathematics classroom
