Regional Meeting, 1993 *Syntactic Structures and Morphological Information* Uwe Junghanns, Luka Szucsich, 2011-11-21 The book contains ten papers discussing issues of the relation between syntax and morphology from the perspective of morphologically rich languages including among others Indo European languages indigenous languages of the Americas Turkish and Hungarian The overall question discussed in this book is to what extent morphological information shows up in syntactic structures and how this information is represented The authors adopt different theoretical frameworks such as the Derivational Theory of Morphology Distributed Optimality Head driven Phrase Structure Grammar Lexical Functional Grammar Lexical Decomposition Grammar combined with Linking Theory and OT like constraints Paradigm Based Morphosyntax as well as the Principles and Parameters Approach of Generative Grammar Caboodle of Short Stories P. Kasturi Rangan, This collection of 8 stories for children and the age defying adults has been written over a period of many years now The first story was written some 10 years back and I had no idea that one day I will bring it out as a compendium of my short stories The feedbacks I received when I published the first ones as stand alone stories propelled me without a conscious but irresistible rudder towards this goal I write a story without any set boundary or time when I feel like it towards the act of writing I simply put down on paper the incessant urge I feel to weave a story Some of these stories started with just an off hand comment from a colleague or friend whereas others were more of an exertion of thought towards reaching a certain goal The goal is always to produce a story that will be liked by children as well as by adults who are still young at

heart Physical age is not counted Most of the stories that I see for children nowadays seem to me to be preachy They seem to treat the child as a vessel of change by turning their thoughts towards behaving better or giving out some morals to shape their course of life Its as if we adults some only in appearance want the child to behave or live an utopian life when such utopia exists only in our dreams I have tried my best to refrain from such efforts and to treat kids as kids and provide them a situation a problem and a possible solution The teaching part is left out and the learning is for to the child to figure out If the story puts a smile on the face of the reader I shall feel my purpose is achieved I strongly feel that a child should be left alone to enjoy his or her childhood They shall soon have to grow up and conform to societal and other pressures The pressure to live in a certain way will come with time These stories are meant to provide them an alternative way to enjoy their time and to plot for their next adventure The adventure called Life Thanks to all who knowingly or surreptitiously helped with the course of these stories Their comments and behaviours have made these stories flow sometimes into unknown territories from which I had to struggle hard to rescue them and sometimes myself as well I hope you like them Illustrations for the stories have been done by Sahayaa Jeevan Thanks a lot for your help P Kasturi Rangan **Around Rakaposhi** Brian H.
