Solution to an Injustice in Trials Sinclair Banks, 2019-03-01 This 664 page law and logic book contains the most comprehensive and detailed description of the composition of argument ad hominem ever published revealing this form of argument to be a far broader fallacy than was previously known Like perjury argument ad hominem can deceive juries and cause unjust trial verdicts There is fortunately already a criminal law against perjury but unfortunately there is currently no law that expressly prohibits argument ad hominem in trials The book includes the text of a proposed criminal law that expressly prohibits argument ad hominem in trials and shows the necessity of such a law to counter effectively this quite common form of injustice in jury trials For more description of the book's content and to view the dust jacket please visit sinclairbanks.com author

Controlled Natural Language Norbert E Fuchs, 2010-07-06 Controlled natural languages CNLs are subsets of natural languages obtained by stricting the grammar and vocabulary in order to reduce or eliminate ambiguity and complexity Traditionally controlled languages fall into two major types those that prove readability for human readers and those that enable reliable automatic semantic analysis of the language The second type of languages has a formal logical basis i e they have a formal syntax and semantics and can be mapped to an existing formal language such as first order logic Thus those languages can be used as knowledge representation languages and writing of those languages is supported by fully automatic consistency and redundancy checks query answering etc Wikipedia Various controlled natural languages of the second type have been developed by a number of organizations and have been used in many different application domains most recently within the Semantic Web The workshop CNL 2009 was dedicated to discussing the similarities and the differences of existing controlled natural languages of the second type possible improvements to these languages relations to other knowledge representation languages tool support existing and future applications and further topics of interest **Soochow Journal of Mathematics** ,2004 **Subject Guide to Books in Print** ,2001
