Life Science Caps 2014 Paper2

David Baud

Life Science Caps 2014 Paper2:

China's Peasant Agriculture and Rural Society Jan Douwe van der Ploeg, Jingzhong Ye, 2016-05-20 China's agriculture and rural society has undergone rapid changes in recent years. Many poorer farmers and younger people have moved to cities and yet China has an immense challenge to feed a growing and more affluent population. This book provides a bottom up view of China's agriculture showing how the many millions of Chinese peasants make a living. It presents a vivid description of the mechanisms used by rural households to defend and sustain their livelihoods, increase their agricultural production and improve the quality of their lives. The authors examine the newly emerging trajectories of entrepreneurial and capitalist farming and assess whether such alternatives will be able to meet the enormous social, economic and environmental challenges that China faces. The book also explores the paradigm that has underpinned the organisation and development of China's agriculture from ancient times to the present day. This shows the importance of balancing in the Chinese model as compared to the one-sided imposition of continual modernization in the western model. It is argued that such balancing is at the core of the current Sannong policy referring to the three ruralities of food sovereignty, wellbeing for peasant households and an attractive countryside.

A Living History of Immunology Kendall Arthur Smith, 2015-11-04 In the highly competitive world of biomedical science, often the rush to publish and to be recognized as first with a new discovery, concept or method is lost in the hurly burly of the moment as the maddening crowd moves on to the next new thing. One of the great things about immunology today is that it has only become mature as a science within the last half century and especially within the past 35 years as a consequence of the revolution of molecular immunology which has taken place only since 1980. Consequently, most of those who have contributed to our new understanding of how the immune system functions are still alive and well and still contributing. Thus *A Living History of Immunology* collates many stories from the investigators who actually performed the experiments that have established the frontiers of immunology. Accordingly, this volume combats revisionist science by those who want to alter history by telling the stories a different way than actually happened. In this regard, one of the good things about science vs other disciplines is that we have the written record of what was done, when it was done, and by whom. Even so, we do not have the complete story or narrative of how and why experiments were done and what made the differences that led to success. This volume captures and chronicles some of these stories from the past fifty years in immunology.

Digital technologies in agriculture and rural areas Food and Agriculture Organization of the United Nations, 2019-06-01 This report aims to identify the different scenarios where the process of digital transformation is taking place in agriculture. This identifies those aspects of basic conditions such as those of infrastructure and networks, affordability, education and institutional support. In addition, enablers are identified which are the factors that allow adopting and integrating changes in the production and decision-making processes. Finally, it identifies through cases existing literature and reports how substantive changes are taking place in the adoption of digital technologies in agriculture.

The Field of

Water Policy Franck Poupeau, Brian O'Neill, Joan Cortinas Muñoz, Murielle Coeurdray, Eliza Benites-Gambirazio, 2019-12-06

Bringing together the analysis of a diverse team of social scientists this book proposes a new approach to environmental problems Cutting through the fragmented perspectives on water crises it seeks to shift the analytic perspectives on water policy by looking at the social logics behind environmental issues Most importantly it analyzes the dynamic influences on water management as well as the social and institutional forces that orient water and conservation policies The first work of its kind *The Field of Water Policy Power and Scarcity in the American Southwest* brings the tools of Pierre Bourdieu's field sociology to bear on a moment of environmental crisis with a study of the logics of water policy in the American Southwest a region that allows us to see the contest over the management of scarce resources in a context of lasting drought As such it will appeal to scholars in the social and political sciences with interests in the environment and the management of natural resources

Ethical Dimensions of Commercial and DIY Neurotechnologies, 2020-04-20 Ethical Dimensions of Commercial and DIY Neurotechnologies Volume Three the latest release in the Developments in Neuroethics and Bioethics series highlights new advances in the field with this new volume presenting interesting chapters on timely topics surrounding neuroethics and bioethics Each chapter is written by an international board of authors
