Hogue, Jorge G. Ruiz, 2022-02-01 This book provides a comprehensive review of the assessment and management of older people's oral health care needs. Discussing recent initiatives to emphasize oral health promotion and prevention, the book describes improvements in pharmacological and non-pharmacological approaches for special populations in geriatrics and illuminates the role of barriers to oral health care for older people. Divided into three sections, the book first explores aging and oral health, including age-related changes, epidemiology, nutrition, dysphagia, aspiration pneumonia, xerostomia, and hyposalivation; management of periodontal disease and caries; systemic diseases that influence oral health; and considerations for chronic orofacial pain. The second section illuminates the ways in which frailty and other geriatric syndromes influence oral health care in older adults, with a special focus on frailty, dementia, delirium, and depression, and the delivery of oral health care to vulnerable geriatric populations in long-term care, home care, palliative care, and hospice. Lastly, the book addresses inequalities in the oral health of older minority populations, the disproportionate burden of oral disease and tooth loss, the contribution of these issues to further complications in comorbidities, the association of extended health literacy and periodontal disease, and the social and cultural conditions that might be altered or improved by healthcare programs and health policies. **Oral Health and Aging** is a useful book written by an international group of experts and designed to educate geriatricians, primary care physicians, nurses, dentists, dental hygienists, speech and language pathologists, dietitians, and health policy advocates.

**Recent Advances in Freshwater Crustacean Biodiversity and Conservation** Tadashi Kawai, D. Christopher Rogers, 2021-03-07 *Recent Advances in Freshwater Crustacean Biodiversity and Conservation* focuses on minor crustacean groups and regionally endemic groups all from freshwaters. Chapters in this book cover crustaceans such as Maxillopods, Mysids, Cumaceans, Isopods, Amphipods, Branchiopods, Copepods, and Decapods. Each looks at global or regional fauna and discusses conservation issues for that group. The majority of the chapters are based on papers presented at symposia organized by the editors at two international scientific meetings held in Barcelona and Washington DC. The contributors are world-renowned experts on their groups as well as on freshwater crustacean conservation and biodiversity at global levels. It has previously been difficult for conservation managers, NGOs, and university professors and students who may not have access to comprehensive journal subscriptions to find relevant information on diversity and conservation of freshwater crustaceans. This book meets that need, addressing crustacean groups not previously treated and providing additional information beyond any presented in existing books. As the editors write in their introduction, we cannot conserve and we cannot protect what we do not know exists. This is a reliable cutting-edge reference for anybody involved in crustacean research, students, researchers, agencies, and NGOs, as well as science educators, conservationists, and government conservation policymakers. The book will also be useful for those working in aquaculture and fisheries, given that many of the taxa discussed are economically important. *September 2023 - Surplus Record Machinery & Equipment* Tom Scanlan, SURPLUS RECORD is the leading independent business directory of new and used capital equipment, machine tools.
