Char, Keith O. Geddes, Gaston H. Gonnet, Benton L. Leong, Michael B. Monagan, Stephen M. Watt, 2012-12-06 The design and implementation of the Maple system is an ongoing project of the Symbolic Computation Group at the University of Waterloo in Ontario Canada This manual corresponds with version V roman numeral five of the Maple system The on line help subsystem can be invoked from within a Maple session to view documentation on specific topics In particular the command updates points the user to documentation updates for each new version of Maple The Maple project was first conceived in the autumn of 1980 growing out of discussions on the state of symbolic computation at the University of Waterloo The authors wish to acknowledge many fruitful discussions with colleagues at the University of Waterloo particularly Morven Gentleman Michael Malcolm and Frank Tompa It was recognized in these discussions that none of the locally available systems for symbolic computation provided the facilities that should be expected for symbolic computation in modern computing environments We concluded that since the basic design decisions for the then current symbolic systems such as ALTRAN CAMAL REDUCE and

to design a new system MACSYMA were based on 1960 s computing technology it would be wise from scratch taking advantage of the software engineering technology which had become available since then as well as drawing from the lessons of experience Maple s basic features e g elementary data structures input output arithmetic with numbers and elementary simplification are coded in a systems programming language for efficiency [Maple V](#) Waterloo Maple Incorporated,2011-10-23 Maple V Mathematics Learning Guide is the fully revised introductory documentation for Maple V Release 5 It shows how to use Maple V as a calculator with instant access to hundreds of high level math routines and as a programming language for more demanding or specialized tasks Topics include the basic data types and statements in the Maple V language The book serves as a tutorial introduction and explains the difference between numeric computation and symbolic computation illustrating how both are used in Maple V Release 5 Extensive how to examples are presented throughout the text to show how common types of calculations can be easily expressed in Maple Graphics examples are used to illustrate the way in which 2D and 3D graphics can aid in understanding the behaviour of problems **Maple User's Manual, Second Edition** University of Waterloo. Department of Computer Science,K. O. Geddes,G. H. Gonnet,B. W. Char,1982 **A Guide to Maple** Ernic Kamberich,2011-06-27 This hands on book is for people who are interested in immediately putting Maple to work The reader is provided with a compact fast and surveyable guide that introduces them to the extensive capabilities of the software The book is sufficient for standard use of Maple and will provide techniques for extending Maple for more specialized work The author discusses the reliability of results systematically and presents ways of testing questionable results The book allows a reader to become a user almost immediately and helps him her to grow gradually to a broader and more proficient use As a consequence some subjects are dealt with in an introductory way early in the book with references to a more detailed discussion later on **Maple 12** ,2008
