

Edexcel GCSE History Paper 3 Exam Practice

12 Mark Exam Question

Exemplar Question:

Explain why US involvement in Vietnam increased in the years 1963-65. (12 marks)

You may use the following in your answer:

- US advisors
- The Gulf of Tonkin Resolution

Advice:

- This type of question on the GCSE exam paper is asking you to explain a few reasons why an event happened or took place.
- The time that you should take to complete this question in the exam is roughly 15 minutes.
- As part of the exam question you are provided with two pieces of information that may help you with the answer.
- If you choose not to use the two bullet points to create paragraphs you will not have marks taken off you so long as you provide two other information points to support your answer.
- If you do use the two information points in your answer you WILL need to include a new key point of your own.
- If you wish to achieve a higher score out of 12 for this question then you need to include your own information.
- In the answer booklet provided by Edexcel you will have 2 sides of A4 lined paper to answer the question.
- It is not compulsory for you to use both sides of A4 but you need to write at least 3 paragraphs to give you the best chance of getting the highest mark.

TOP TIPS:

- Make sure that you read the question. This one is asking you to explain WHY something happened?
- If it is worth 12 marks then you need to provide 3 clear reasons for WHY the USA became more involved in the Vietnam War between 1963-1965.
- Check the dates – do not refer to events after 1965.
- You need some analysis.
- Your answer needs to make sense.

You need specific accurate information in your answer (you don't get marks for guessing):

- Accurate dates (when an event happens – don't guess!)
- Accurate names (presidents, leaders, names of boats, battles and equipment)
- Accurate statistics (how many soldiers arrive in Vietnam, how much did USA involvement increase, what amount of money was spent, how many people died).

The Art of Uncertainty David Spiegelhalter, 2025-03-04 Named a Best Book of the Year by Forbes and The Economist From our greatest living statistical communicator Tim Harford comes an invaluable data driven guide for understanding and learning to embrace risk and uncertainty in our daily lives How dangerous is our diet How much of sports falls into the realm of luck When authorities categorize a given event as highly likely how likely is that really Whether we re trying to decide if the benefits of a new medication are worth the chance of side effects or if artificial intelligence truly threatens humanity our lives are riddled with uncertainties both everyday and existential yet it can be difficult to know how to properly weigh all those unknowns Luckily for us renowned statistician David Spiegelhalter has spent his career dissecting data to resolve the apparently random and decode the many decisions we face with imperfect information In *The Art of Uncertainty* he shows how we can become better at dealing with what we don t know to make smarter choices in a world so full of puzzling variables In lucid lively prose Spiegelhalter guides us through the principles of probability illustrating how they can help us think more analytically about everything from medical advice to sports to climate change forecasts He demonstrates how taking a mathematical approach to phenomena we might otherwise attribute to fate or luck can help us sort hidden patterns from mere coincidences better evaluate cause and effect and predict what s likely to happen in the future Along the way we learn how a misinterpretation of a probability contributed to the infamous Bay of Pigs fiasco why a ship twice the size of the Titanic sank without a trace and why we can be so confident that no two properly shuffled decks of cards have ever been in the same order Sparkling with wit

and fascinating real world examples this is an essential guide to navigating uncertainty while also retaining the humility to admit what we don't or simply cannot know

Textiles Technology Through Diagrams Jane Down, 2001 This text is part of the Oxford Revision Guides series which builds on the fact that pictures are easier to memorize than words All the necessary facts figures content and concepts are presented in diagrammatic form This visual approach to learning means that students should be able to absorb the information easily and effectively The book also helps students with their coursework With 60 per cent of the total marks at GCSE being awarded for coursework the revision guide contains a chapter devoted to the skills needed for success in this area

The University of Google Professor Tara Brabazon, 2012-12-28 Looking at schools and universities it is difficult to pinpoint when education teaching and learning started to haemorrhage purpose aspiration and function Libraries and librarians have been starved of funding Teachers cram their curriculum with skill development and generic competencies because knowledge creativity and originality are too expensive to provide to unmotivated students and parents obsessed with league tables not learning Meanwhile the internet offers a glut of information on everything under the sun a mere mouse click away Bored surfers fill their cursors and minds with irrelevancies We lose the capacity to sift discard and judge Information is no longer for social good but for sale Tara Brabazon argues that this information fetish has been profoundly damaging to our learning institutions and to the ambitions of our students and educators In *The University of Google* she projects a defiant and passionate vision of education as a pathway to renewal where research is based on searching and students are on a journey through knowledge rather than consumers in the shopping centre of cheap ideas Angry humorous and practical in equal measure *The University of Google* is based on real teaching experience and on years of engaged and sometimes exasperated reflection on it It is far from a luddite critique of the information age Tara Brabazon celebrates the possibilities of digital platforms in education but deplors the consequences of placing funding on technology and not teachers In doing so she opens a new debate on how to make our educational system both productive and provocative in the post information age
