Video provides a powerful way to help you prove your point. When you click Online Video, you can paste the URL of a video for the video you want to use. You can also type a keyword to search for the video you want to use. To make a video stand out, you can add a video background, a video cover, a video title, and a video sidebar. Click Insert and then choose the elements you want from the different galleries.

Themes and styles also help keep your document coordinated. When you click Design and choose a new Theme, the pictures, charts, and SmartArt graphics change to match your new theme. When you apply a new style, you are applying a new style to match the new theme.

Save as in Word with a new ribbon that shows up where you need them. To change the way a picture fits on the document, click the picture and a button for layout options appears next to it. When you work on a table, you can click the plus sign to add a row or a column, and then click the plus sign.

Reading is easier, too, in the new reading view. You can collapse parts of the document and focus on the text you want. If you need to stop reading before you reach the end, Word remembers where you left off - even on another device.
