

1. Mount the pump firmly to the floor in a dry accessible location with good ventilation for cooling. The pump and control must be protected from freezing temperatures.
2. Apply pipe sealant on the male threads of the tailpiece, then slide the tailpiece through the union nut and then thread the tailpiece into the pump. **DO NOT** apply any pipe sealant on pump threads.
3. An O-ring should be installed in groove on the top of the tailpiece. Tighten the union nut to the control body, rotating the control and pressure gauge so they are visible and accessible.
4. Connect the pump cord to the control cord. Do not energize the control with power yet. Energizing the control with power prior to filling with water will cause the pump to run dry and void warranty.
