important for understanding tumor biology and identifying vulnerability of cancer cells This interaction between immune cells and cancer cells is a complex and dynamic process in which immune cells act as a determinant factor of cancer cells fate and vice versa There are some provocative questions that remain to be addressed How does metabolic reprogramming contribute to an altered immune response against cancer cells Furthermore how do immune cells influence cancer cells during cancer progression metastasis and therapy It is critical to understand the cellular molecular and biochemical aspects of how cancer cells reprogram their metabolism to overcome infiltrated immune cells and immune evasion for tumor growth metastasis and therapy response Understanding these processes could generate new therapeutic opportunities for cancer treatment Also it is important to understand and identify therapeutic targets that interrupt the cancer promoting association between cancer cells and the adjacent immune cells allowing for maximizing benefits of immune checkpoint inhibitors as well as other genetic targeted therapy and cellular such as chemotherapy therapies The purpose of this Research Topic is to feature articles focused on various aspects of cancer immune onco metabolism associated with the tumor microenvironment and their implications in cancer therapy and therapeutic responses We welcome the submission of Original Research articles Perspectives Opinions Systematic Reviews Reviews and Mini Reviews highlighting new advances including but not limited to Cellular bioenergetics such as glucose fatty acid and amino acid metabolism or systemic cancer metabolic dysregulation like diabetes obesity and cancer and their role in modulating therapeutic responses and immune functions Mitochondrial metabolism and dysfunction ROS signaling and redox homeostasis Signaling pathways involved in regulating the interaction between cancer metabolism and the immune system Immune metabolism in the tumor microenvironment Inflammation and cancer metabolism Innate and adaptive immune response in the tumor microenvironment modulation of immunotherapeutic responses by cancer metabolism and vice versa And we welcome the submission of Methods articles and Study Protocols including these areas but not limited to Any new and advanced method technology to study metabolism in general Metabolism in cancer and immune cells and their interactions Please note Manuscripts consisting solely of bioinformatics or computational analysis of public genomic or transcriptomic databases which are not accompanied by validation independent cohort or biological validation in vitro or in vivo are out of scope for this section and will not be accepted as part of this Research Topic
