Childress, 2023-10-14 The multiple related fields encompassed by this Major Reference Work represent a convergence of issues and topics germane to the rapidly changing segments of knowledge and practice in educational communications and technology at all levels and around the globe. There is no other comparable work that is designed not only to gather vital current and evolving information and understandings in these knowledge segments but also to be updated on a continuing basis in order to keep pace with the rapid changes taking place in the relevant fields. The Handbook is composed of substantive 5 000 to 15 000 words, peer reviewed entries that examine and explicate seminal facets of learning theory, research, and practice. It provides a broad range of relevant topics including significant developments as well as innovative uses of technology that promote learning performance and instruction. This work is aimed at researchers, designers, developers, instructors, and other professional practitioners. Curriculum for High Ability Learners Liang See Tan, Letchmi Devi Ponnusamy, Chwee Geok Quek, 2016-12-26 Given the increasing speed of change and the information explosion around the world, this book draws attention to the practice of teaching for conceptual understanding, which has been heralded as an effective approach within many curriculum frameworks. This book is pivotal in documenting and analyzing efforts in creating concept-based curriculum and pedagogies for high ability learners. Contributors of this book discuss key concepts and trends in their curriculum development efforts for high ability learners, as well as the challenges and solutions in their work. Drawing from a wide group of educators, practitioners, curriculum writers, administrators, and researchers, this book has assembled together a range of perspectives on the processes, outcomes, and implications of using concept-based curriculum and pedagogies in a dynamic educational landscape. These informed perspectives, highlighted by the contributors, will prove insightful and inspirational to practitioners, policy makers, and other stakeholders alike.
