MEMORANDUM

Grade 9 Technology Paper Term 1 For 2014

Union of International Associations

Grade 9 Technology Paper Term 1 For 2014:

Media Exposure During Infancy and Early Childhood Rachel Barr, Deborah Nichols Linebarger, 2016-11-24 This book discusses the burgeoning world of young children's exposure to educational media and its myriad implications for research theory practice and policy. Experts across academic disciplines and the media fill knowledge gaps and address concerns regarding apps, eBooks, and other screen-based technologies which are being used by younger and younger children and content delivery and design. Current research shows the developmental nuances of the child as learner in home, school, and mobile contexts and the changes as parenting and pedagogy accommodate the complexities of the new interactive world. The book also covers methods for evaluating the quality of new media and prosocial digital innovations such as video support for separated families and specialized apps for at-risk toddlers. Highlights of the coverage: The role of content and context on learning and development from mobile media; Learning from TV and touchscreens during early childhood; Educational preschool programming; How producers craft engaging characters to drive content delivery; The parental media mediation context of young children's media use; Supporting children to find their own agency in learning. *Media Exposure During Infancy and Early Childhood* is an essential resource for researchers, clinicians, and related professionals and graduate students in diverse fields including infancy and early childhood development, child and school psychology, social work, pediatrics, and educational psychology.

After Piketty Heather Boushey, J. Bradford DeLong, Marshall Steinbaum, 2017-05-08 Are Thomas Piketty's analyses of inequality on target? Where should researchers go from here in exploring the ideas he pushed to the forefront of global conversation? In *After Piketty*, a cast of economists and other social scientists tackle these questions in dialogue with Piketty in what is sure to be a much-debated book in its own right.

Mobile Broadband Communications for Public Safety Ramon Ferrús, Oriol Sallent, 2015-08-07 This book provides a timely and comprehensive overview of the introduction of LTE technology for PPDR communications. It describes the operational scenarios and emerging multimedia and data-centric applications in demand and discusses the main techno-economic drivers that are believed to be pivotal for an efficient and cost-effective delivery of mobile broadband PPDR communications. The capabilities and features of the LTE standard for improved support of mission-critical communications, e.g., proximity services, group communications, are covered in detail. Also, different network implementation options to deliver mobile broadband PPDR communications services over dedicated or commercial LTE-based networks are discussed, including the applicability of the Mobile Virtual Network Operator (MVNO) model and other hybrid models. Radio spectrum matters are also discussed in depth, outlining spectrum needs and providing an outlook into allocated and candidate spectrum bands for PPDR communications and suitable dynamic spectrum sharing solutions in PPDR communications. Explanations are accompanied by a vast collection of references that allow the more intrigued reader to gain further insight into the addressed topics.
