

## Chapter 11 Intro to Genetics Test

### Multiple Choice

Identify the letter of the choice that best completes the statement or answers the question.

- Offspring that result from crosses between true-breeding parents with different traits
  - are true-breeding.
  - make up the F<sub>2</sub> generation.
  - make up the parental generation.
  - are called hybrids.
- Mendel concluded that traits are
  - not inherited by offspring.
  - inherited through the passing of factors from parents to offspring.
  - determined by dominant factors only.
  - determined by recessive factors only.
- When Mendel crossed true-breeding tall plants with true-breeding short plants, all the offspring were tall because
  - the allele for tall plants is recessive.
  - the allele for short plants is dominant.
  - the allele for tall plants is dominant.
  - they were true-breeding like their parents.
- In the P generation, a tall plant was crossed with a short plant. Short plants reappeared in the F<sub>2</sub> generation because
  - some of the F<sub>2</sub> plants produced gametes that carried the allele for shortness.
  - the allele for shortness is dominant.
  - the allele for shortness and the allele for tallness segregated when the F<sub>1</sub> plants produced gametes.
  - they inherited an allele for shortness from one parent and an allele for tallness from the other parent.
- The principles of probability can be used to
  - predict the traits of the offspring produced by genetic crosses.
  - determine the actual outcomes of genetic crosses.
  - predict the traits of the parents used in genetic crosses.
  - decide which organisms are best to use in genetic crosses.
- A Punnett square shows all of the following EXCEPT
  - all possible results of a genetic cross.
  - the genotypes of the offspring.
  - the alleles in the gametes of each parent.
  - the actual results of a genetic cross.
- How many different allele combinations would be found in the gametes produced by a pea plant whose genotype was RrYY?
  - 2
  - 4
  - 8
  - 16
- A cross of a white hen with a black rooster produces erminette-color offspring. This type of inheritance is known as
  - incomplete dominance.
  - polygenic inheritance.
  - codominance.
  - multiple alleles.

**Basic Genetics** Robert F. Weaver, Philip W. Hedrick, 1995 This text provides a balanced coverage of clinical and molecular genetics Experimental highlights and extensive use of learning aids are used throughout After a broad introduction to the topic the book is divided into 3 parts Part one explores Mendelian genetics including chromosomes and genetic linkage Part two looks at molecular genetics covering chemistry of a gene repluation and recombination of genes and transcription and its control in prokaryotes The final part introduces population genetics and discusses some of their extensions and applications

**Contemporary Issues in Bioethics** James J. Walter, Thomas A. Shannon, 2005-12-08 Contemporary Issues in Bioethics A Catholic Perspective applies the best of the Roman Catholic theological and ethical tradition to some of the most controversial and complex bioethical topics that confront contemporary society Authors James Walter and Thomas Shannon offer a fresh analysis from the Catholic tradition and show how a specifically Catholic perspective might inform public discussion on these issues In an age where it is claimed that religion should not be part of ethical discussion on bioethical issues this book takes a decidedly different tack and shows that the Catholic tradition has something very important to offer Contemporary Issues in Bioethics combines clear concise and accessible prose with teachable case studies on such issues as reproductive cloning quality of life and clinical decision making and the withdrawal of artificial nutrition and hydration Divided into four sections theological issues issues at the beginning of life issues with genetic medicine and the care of ill patients and issues at the end of life this book is ideal for use in college university and seminary courses on bioethics as well as for medical professionals policy makers and individual readers
