interpretations of these graphemes The New Catalog uses an original coding system developed for the Maya Hieroglyphic Database Project The new three digit codes group the graphemes according to their visual rather than functional characteristics to allow readers to see distinctions between similar signs Each entry contains the grapheme s New Catalog code an image the corresponding Thompson number proposed syllabic and logographic values calendrical significance and bibliographical citations Appendices and an index of signs from both volumes contain images of all graphemes and variants ordered by code allowing readers to search for graphemes by visual form or by their proposed logographic and phonetic values Together the two volumes of the New Catalog represent the most significant updating of the sign lists for the Maya script proposed in half a century They provide a cutting edge reference tool critical to the research of Mesoamericanists in the fields of archaeology art history ethnohistory and linguistics and a valuable resource to scholars specializing in comparative studies of writing systems and related disciplines Science John Michels,1883 *Nature* ,1897
