LEARN EVOLUTION VIRTUAL LAB

ANSWER THE FOLLOWING QUESTIONS AS YOU OBSERVE THE VIRTUAL LAB

Answer the following questions as you observe the virtual lab.

Question 1

1. As the organisms of the virtual lab are being subjected over eight weeks and generations, what happens that demonstrates natural selection is occurring? How does this occur? What is the result?

Initially, the birds in groups change by color. Mutation was selected to occur. When birds are selected they camouflage and fall because of the trigger. Groups with more birds survive.

2. An organism is a member of a species that is defined by its ability to reproduce. In nature, the ability to survive and reproduce is a result of natural selection. Which are examples of natural selection? Which are examples of artificial selection?

Example: target the birds and birds which survive are those that survive. I think that's what's going on. From that, it's not really getting better.

3. Explain why the birds in the virtual lab are being selected. How does this occur? What is the result?

They survive because the birds that are selected are the ones that survive.

4. Which are examples of natural selection? Which are examples of artificial selection?

Species with similar body types and behaviors. One example of the natural selection and the artificial selection is the birds.

5. How does natural selection occur in nature?

Example: the birds in the virtual lab are being selected. One example of the natural selection is the birds.
