Exploitation Conservation Preservation Geographic Perspective:

Exploitation, Conservation, Preservation Susan L. Cutter, Hilary Lambert Renwick, William H. Renwick, 1989

Exploitation Conservation Preservation Susan L. Cutter, William H. Renwick, 2003-06-02 Focusing on the environment and environmental policy this text examines the dynamic interplay among the physical economic social and political forces impacting the major natural resource issues of today's world. Written by authors with contrasting scientific and philosophical views it presents a wide range of opinions and interpretations of these issues that results in a balanced review and solid basis for discussion. The inclusion of up to the minute critical quantitative data on natural resource conditions and use along with important Internet references inform students while preparing them to analyze and evaluate the significance of resource patterns and trends as objectively as possible.

An Introduction to Human-Environment Geography William G. Moseley, Eric Perramond, Holly M. Hapke, Paul

Laris, 2013-08-05 This introductory level text explores various theoretical approaches to human environment geography demonstrating how local dynamics and global processes influence how we interact with our environments. Introduces students to fundamental concepts in environmental geography and science. Explores the core theoretical traditions within the field along with major thematic issues such as population food and agriculture and water resources. Offers an engaging and unique view of the spatial relationships between humans and their environment across geographical locations around the world. Includes a variety of real world policy questions and emphasizes geography's strong tradition of field work by featuring prominent nature society geographers in guest field notes.

Environmental Management and Development Christopher J.

Barrow, 2005 The environment and its management has been and continues to be a very topical issue. Existing environment and development texts place emphasis on listing problems making warnings and voicing advocacy but by focusing on environmental management this informative book offers a very different perspective. Moving on from the usual much discussed viewpoints Barrow looks towards practical management and problem solving techniques. He clarifies the definition nature and role of environmental management in development and developing countries beginning with an introduction to the key terms issues and tools of environmental management which are linked and developed in later chapters and concluding by discussing who pays for environmental management and its future in developing countries. Written by an experienced and well known author this clear user friendly book ideal for students of resource management geography and development studies makes excellent use of chapter summaries boxed case studies annotated further readings and websites discussion questions and illustrations.
