Dr. Himanshu Agarwal

Associate Professor, Department of Commerce, Deva Nagri College, Meerut, UP, India.

Abstract

Publication of research papers in reputed and referred journals has become mandatory for teachers, professors and research scholars. Paper must be plagiarism free and scholarly written with scientific validity and reasonable conclusion. Most of the researchers does not differentiate among research paper, article and essay. Researchers are not aware what they are aiming at. The present paper guides researchers about writing a scholarly research paper. There is a specified stepwise procedure of writing scholarly research paper. All researchers must follow that pattern. It is a 7-point strategy. The steps suggested by the author are sole experience of the author. Author is chief editor of Journal of Commerce and Trade.

Keywords: Research Paper; Article; Essay; Plagiarism; Citation; Referencing; Abstract; Journal.

1. Introduction

Research and writing research papers are becoming scientific day by day. Ph. D. students, teachers or professors are being recognized through their published research works. In the recent past in India, it has been made mandatory for every teacher or professor and for every Ph.D. student to get their research papers published in UGC-CARE listed journals or Scopus registered journals. This need is aroused for taking promotions in colleges or universities or for the award of Ph.D. Degrees. Apart from this, government initiated to curb copying of other researchers' work to ban 'literature theft'. It has also made writing of paper very scientific in nature. The research paper must ensure an acceptable level of plagiarism. Moreover, ResearchGate, google scholar, zenodo and other such platforms have emerged to evaluate and to judge the work of researchers. These portals have a public viewing that gives rating to the registered researchers on their platforms.

Before knowing the writing scholarly research paper, one has to understand clearly what the research paper is. Most of the researches fail because they are not 'research papers'. Largely,

Why are quotations in academic papers taken from only secondary sources problematic? Sandra Intemann, 2016-07-15 Essay from the year 2016 in the subject Philosophy Practical Ethics Aesthetics Culture Nature Right grade 1-3 Leuphana Universität Lüneburg Wissenschaftsethik language English abstract To find out whereas quotations in academic articles and or monographs solely out of secondary and not primary sources are problematic from the perspective of academic ethics in general and business ethics in particular one will first have a closer look on the key terms An academic article is a scientific text published in a scientific journal and supervised by other scientists A monograph is a scientific text about a single subject by one author Sources are distinguished in primary and secondary sources primary sources are scientific research results which are published at first hand containing Secondary sources refer to a primary source which was published by another author and not collected by the author himself For an evaluation of the use of the sources in a business or academic environment ethical standards and moralities are used Within academic ethics scientists have the duty to act responsibly and to define moralities for their practice and the way they do research and publish their results On the other hand the business ethics defines right

or wrong behaviour in a business context To discuss whereas the use of secondary sources is problematic one will analyse the involved parties which are the users of the sources the author of the primary source the author of the secondary source and the scientific community Within all parties involved in the problem there is always a least privileged party according to John Rawls On the one hand using solely sources could be interpreted as one kind of plagiarism even if the source is cited correctly Further the readers do not make an own effort into research because she takes the easy way out using solely secondary sources The readers have to wonder whether it is legitimate to rely on the author of the secondary source that he summarized analysed etc the primary source correctly It would have a massive negative impact on academic and business ethics if the author of the secondary source made a mistake in summarizing analysing or wrong conclusion drawing As a result wrong information would be used for following work in business areas or research in academic areas On the other hand the access to primary sources may be difficult or even not possible so the use of a secondary source is the only way to use the information Further one has to wonder whether it is it legal to intervene to solely use secondary sources as it violates the copyright law
