## ANGLED (APC) CONNECTORS

APC connectors are typically dark green and feature an 8° angled end face. The angled construction provides less overall loss and is ideal for outside plant, demarcation wiring, internet broadband and other high optical wavelength applications.

*Before the modem, use APC connectors.  
After the modem, use UPC connectors.*

## TROUBLESHOOTING CONNECTIONS

**Check connection polarity.** If using a duplex connection (two strands), swap the connections. Most fiber signals rely on separate transmit and receive paths.

**Check your connectors.** Is a connector loose? Often re-terminating solves the issue.

**Check your connections.** Is a connection or patch point loose or dirty? How many inline connections are in the run? Too many connections can cause too much signal loss.

**Clean your connections.** Remove dirt, dust and oil from fingerprints with pen-style cleaners or alcohol wipes.

**Check for breaks.** Identify cable damage using a VFL or OTDR cable tester. When identified, re-splice the cable.

**Check your cable distance.** Multimode fiber has a typical maximum distance of 300m / 1000 feet. Longer runs require single-mode fiber.

**Check compatibility.** Some devices, especially AV over fiber extenders, are specific to either multimode or single mode fiber. Ensure the installed cable matches the device requirements.
