

FETAL PIG DISSECTION

Introduction:

In this lab you will be examining many characteristics of an unborn mammal – the fetal pig. Dissection will help you to get a 3-dimensional picture of how all the systems fit together in an entire organism. You've seen separate diagrams of many of the major systems. Now you'll get to see how they are all arranged spatially. You'll also get a better idea of the texture of many organs that make up the pig's system. For additional help at home:

This lab will be divided into the following lab components:

#1 – External Anatomy

#2 – Oral Cavity

#3 – Digestive System

#4 – Circulatory System

#5 – Respiratory System

#6 – Urogenital System

#7 – Nervous System

Materials:

preserved fetal pig, dissecting pan, scissors, forceps, blunt probe, twine/string, safety goggles, lab apron, one pair of disposable latex gloves per dissection day, ruler

Lab Participation:

You do not have to physically participate in the actual dissection, but you must be involved in the dissection in some manner. You will be receiving a grade based on lab performance, including but not limited to: treating the pig with respect, properly cleaning up all dissecting tools at the end of the day, coming to class with closed-toe shoes and following other safety protocol.
