

# HP Networking and Cisco CLI Reference Guide

## Introduction

This CLI Reference Guide is designed to help HP partners and customers who:

- Manage multi-vendor networks that include HP and Cisco switches
- Have experience deploying Cisco switches and are now deploying HP switches

This CLI Reference Guide compares many of the common commands in three switch operating systems: HP ProVision, Comware 5, and Cisco operating systems.

The HP ProVision operating system runs on HP 3500, 5400zl, 6200yl, 6600, and 8200zl Switch Series. (Other HP switches use an operating system that is very similar to the ProVision operating system.) Comware 5 runs on H3C and 3Com switches, which are now part of the HP Networking portfolio.

The commands included in this guide were tested on the following:

- HP 3500yl-24G switches running ProVision K.14.41 software
- 3Com 3CR548G-24P-91 switches running Comware 5.20 release 2202P15
- Cisco WS-C3560-24PS switches running Cisco IOS Release 12.2(46)SE

Additional HP ProVision ASIC, H3C or 3Com, and Cisco switches and routers were used to provide systems connectivity and operational support as necessary. Likewise, various computers and voice over IP (VoIP) phones were used to help test functionality and provide output for commands, such as **show** or **display** commands.

Although HP Networking conducted extensive testing to create this guide, it is impossible to test every conceivable configuration and scenario. This document, therefore, cannot be assumed to be complete as it applies to every environment or each manufacturer's complete product platforms and software versions. For complete and detailed use of all commands and their options, refer to each manufacturer's documentation accordingly.

## Using This Guide

This CLI Reference Guide provides CLI command comparisons in two different formats:

- Side-by-side comparison—The basic commands required to execute a given function in each of the operating systems are listed in a table. In this side-by-side comparison, each platform's commands do not always start at the top of the column. Instead, commands that have similar functions are aligned side-by-side so that you can easily "translate" the commands on one platform with similar commands on another platform.
