

# Math 302: Solutions to Homework

Steven Miller

December 14, 2010

## Abstract

Below are detailed solutions to the homework problems from Math 302 Complex Analysis (Williams College, Fall 2010, Professor Steven J. Miller, [sjm1@williams.edu](mailto:sjm1@williams.edu)). The course homepage is

[http://www.williams.edu/Mathematics/sjmiller/public\\_html/302](http://www.williams.edu/Mathematics/sjmiller/public_html/302)

and the textbook is *Complex Analysis* by Stein and Shakarchi (ISBN13: 978-0-691-11385-2). Note to students: it's nice to include the statement of the problems, but I leave that up to you. I am only skimming the solutions. I will occasionally add some comments or mention alternate solutions. If you find an error in these notes, let me know for extra credit.

**Student's Solutions Manual to Finite Math Applied to the Real World** Stefan Waner, 1997 *Mathematics Manual for Water and Wastewater Treatment Plant Operators: Water Treatment Operations* Frank R. Spellman, 2023-07-31 To properly operate a waterworks or wastewater treatment plant and to pass the examination for a waterworks wastewater operator's license it is necessary to know how to perform certain calculations. All operators at all levels of licensure need a basic understanding of arithmetic and problem solving techniques to solve the problems they typically encounter in the workplace. Hailed on its first publication as a masterly account written in an engaging highly readable user friendly style the fully updated *Mathematics Manual for Water and Wastewater Treatment Plant Operators Water Treatment Operations* covers all the necessary computations used in water treatment today. It presents math operations that progressively advance to higher more practical applications including math operations that operators at the highest level of licensure would be expected to know and perform. Features Provides a strong foundation based on theoretical math concepts which it then applies to solving practical problems for both water and wastewater operations. Updated throughout and with several new practical problems added. Provides illustrative examples for commonly used waterworks and wastewater treatment operations covering unit process operations found in today's treatment facilities. All operators at all levels of licensure need a basic understanding of arithmetic and problem solving techniques to solve the problems they typically encounter in the workplace. Hailed on its first publication as a masterly account written in an engaging highly readable user friendly style the *Mathematics Manual for Water and Wastewater Treatment Plant Operators Second Edition* has been expanded and divided into three specialized texts that contain hundreds of worked examples presented in a step by step format. They are ideal for all levels of water treatment operators in training and practitioners studying for advanced licensure. In addition they provide a handy desk reference and handheld guide for daily use in making operational math computations. This second volume *Water Treatment Operations Math Concepts and Calculations* covers computations commonly used in water treatment with applied math problems specific to waterworks operations allowing operators of specific unit processes to focus on their area of specialty. It explains calculations for pumping water source and storage coagulation and flocculation sedimentation filtration chlorination fluoridation and water softening. The text presents math operations that progressively advance to higher more practical applications of mathematical calculations including math operations that operators at the highest level of licensure would be
